MIOSHA Basics

State Plan Program:

- One of 29 State Plans Authorized by Federal OSHA
- Must be “at least as effective as,” Federal OSHA
- Program covers **300,000 Michigan businesses** and **4 million+ Michigan workers**

State Plan Benefits:

- Flexibility/Accessibility/Accountability to Stakeholders
- Broader Consultation Strategy – Additional State Funding
- **Covers additional 500,000+ Michigan public sector workers that would not have protections under OSHA**

Occupational Safety and Health State Plan Association (OSHSPA)

- ❑ Beginning my term as Chair for two years
- ❑ Meet three times per year with OSHA
- ❑ Meetings rotate among the states
- ❑ Opportunity to discuss issues in State Plan and federal OSHA states
 - ❑ Updates from OSHA Directorates – Enforcement, Training, Standards
 - ❑ Presentations from State Plans
 - ❑ Sharing of best practices and discuss new issues

OSHSPA REPORT

2022

Occupational Safety and Health State Plan Association (OSHSPA) Grassroots Report

Federal OSHA Update

❑ Instance by Instance Violations

- ❑ High Gravity Serious & Repeat Citations
- ❑ LO/TO, PRCs, Fall Protection, Machine Guarding

❑ Initiatives/National Emphasis Programs (NEPs)

- ❑ **Mental health** especially rise in suicide rates in construction
- ❑ NEP for **Falls** (All Industries)
- ❑ NEP for **Heat** (Indoors & Outdoors)
- ❑ NEP for **Combustible Dust** – Revised Targeting
- ❑ NEP for **Warehousing** – Heat, Ergo, PIT, Egress

Federal OSHA Standards Update

Pre-Rule Stage

- Heat Standard – OSHA/OSHSPA Workgroup
- Workplace Violence in Healthcare and Social Assistance

Proposed Rulemaking Stage

- Emergency Response – February 2024 – Comments by June 21, 2024**
- Infectious Diseases Standard – Will replace the COVID standard
- Lock Out/Tag Out Standard – Computer based controls
- Silica Standard – Medical Removal, Revise Table 1 for construction
- Tree Care Standard – December 2023

Final Rule Stage

- Hazard Communication – GHS Update
- COVID Standard?????

Federal OSHA Standards Update

Recording and Reporting of Occupational Injuries and Illnesses

- ❑ OSHA rules published in July 2023, went into effect January 2, 2024
- ❑ MIOSHA's rules went into effect February 13, 2024
- ❑ Changes the requirements for electronic submission of records to federal OSHA
- ❑ **Currently**
 - ❑ Employers with 250 or more employees - submit 300A Summary
 - ❑ Employers with 20 to 249 employees in certain industries – submit 300A Summary
- ❑ **New Rules**
 - ❑ Employers with 250 or more employees - submit 300A Summary (same)
 - ❑ Employers with 20 to 249 employees in certain industries – submit 300A (same)
 - ❑ Employers with 100 or more employees in certain industries – submit 300 log & 301 forms
 - ❑ New appendix to list the “certain industries” for the new requirement
 - ❑ Employers are required to include their legal company name in their submission
- ❑ Date of submission remains March 2nd every year

Federal OSHA Standards Update

MIOSHA Administrative Standard Part 11, Recordkeeping and Reporting of Occupational Injuries and Illnesses Electronic Submission Requirements

Basic Requirements (R 408.22141)

Form 300A Summary of Work-Related Injuries and Illnesses	1-19 Employees NO	20-249 Employees YES, if listed on Appendix B	250+ Employees YES, if not listed on Appendix A
Form 300 Log of Work-Related Injuries and Illnesses	1-99 Employees NO	100+ Employees YES, if listed on Appendix C	
Form 301 Injury and Illness Incident Report	1-99 Employees NO	100+ Employees YES, if listed on Appendix C	

*Forms must be submitted by March 2 each year through the OSHA Injury Tracking Application.
*All establishments listed on Appendix A are exempted from electronic submission requirements.

What's NEW?

in MIOSHA

- ❑ Working on maximum penalties to match Federal OSHA
- ❑ Lots of hiring, 20 new positions in FY 2024
- ❑ New Strategic Plan covering FY 2024 – 2028
- ❑ Sixth strategic plan – First plan 1999

Strategic Goal 1

Help assure improved workplace safety and health for all workers, as evidenced by fewer hazards, reduced exposures, and fewer injuries, illnesses and fatalities.

- [High-hazard General Industry](#)
- [Construction DART Rate](#)
- [Fatality Trends](#)

THINK

SAFE

WORK

SAFE

Strategic Goal 2

Promote employer and worker awareness of, commitment to, and involvement with safety and health to effect positive change in the workplace culture.

- [MIOSHA Training Institute](#)
- [Cooperative Programs](#)
- [Connecting MIOSHA to Industry](#)

Strategic Goal 3

Strengthen public confidence through continued excellence in the development and delivery of MIOSHA's programs and services.

- Comment/Suggestion Cards
- Fatality Response 1 Day
- Complaint Response 10 Days

MIOSHA Goals for FY 2024-2028

Strategic Goal #1: Help assure improved workplace safety and health for all workers, as evidenced by fewer hazards, reduced exposures, and fewer injuries, illnesses and fatalities.

1.1 Reduce by 2% a year (10% total for 5 years) the total incidence rate of non-fatal worker injuries and illnesses in high-hazard general industries and general industries showing emerging hazards:

- Food Manufacturing (311)
- Wood Product Manufacturing (321)
- Plastics and Rubber Products Manufacturing (326)
- Nonmetallic Mineral Product Manufacturing (327)
- Primary Metal Manufacturing (331)
- Fabricated Metal Product Manufacturing (332)
- Machinery Manufacturing (333)
- Transportation Equipment Manufacturing (336)
- Hospitals (622)
- Nursing and Residential Care Facilities (623)

1.2 Reduce the number of MIOSHA-covered general industry fatalities by 2% a year (10% total for 5 years).

1.3 Reduce by 1% a year over the 5 years (5% total for five years) the total incidence rate of non-fatal worker injuries and illnesses in the construction industry.

1.4 Decrease the number of fatalities in the construction industry (NAICS 23) by 1% a year over the 5 years (5% total for 5 years) by focusing on the four leading causes of fatalities:

- Falls
- Electrocutions
- Struck-by
- Crushed-by/caught-between

Strategic Goal #2: Promote employer and worker awareness of, commitment to, and involvement with safety and health to effect positive change in the workplace culture.

2.1 Promote safety and health programs (SHP) during 100% of MIOSHA visits. Evaluate the SHP during 100% of comprehensive consultative hazard surveys.

2.2 Increase awareness of and participation in the MIOSHA Training Institute (MTI). Increase MTI participants by 2% a year over the 5 years (10% total for five years) by marketing the MTI to targeted groups.

2.3 Increase participation in MIOSHA cooperative programs.

The following cooperative programs will increase participation over the 5-year period by 5 new MVPP awards; conduct 50 (10 per year) promotions of MVPP; 5 new MSHARP awards; 5 new CET Awards (Silver, Gold, Bronze Certificate of Recognition, and Ergonomic Success); initiate 15 new Michigan Challenge Programs (MCP); conduct 200 promotions of the MCP; 5 new Alliances; and 10 new Partnerships.

2.4 Connect MIOSHA to industry by increasing collaboration and communication to create collective ownership for workplace safety and health.

Strategic Goal #3: Strengthen public confidence through continued excellence in the development and delivery of MIOSHA's programs and services.

3.1 Foster a culture of integrity, inclusion, teamwork, and excellence to strengthen confidence in the delivery of MIOSHA services.

3.2 Respond to onsite complaints within an average of 10 working days of receipt by MIOSHA.

3.3 Respond to all MIOSHA-covered fatalities within 1 working day.

3.4 Use information technology (IT) and communication to better deliver MIOSHA services.

3.5 Help employers access resources and services to improve safety and health programs.

MIOSHA Strategic Plan FY 2024 – 2028 One Page Summary

3 Goals 13 Emphases Many More Strategies

Michigan Voluntary Protection Program (MVPP)

- **Best of the Best**
- **Only 22 MVPP Companies**
- Go beyond minimum standards
- Great partnership opportunities
- Share best practices
- Mentor others

MIOSHA Partnerships

Formal Agreements

- Build trusting, cooperative relationships
- Exchange information on best practices
- Leverage resources to maximize worker safety and health protection
- **Lower I&I rates than non-partnership sites**

MIOSHA Alliances

Formal Agreements w/ Not-for-Profits

- Build trusting, cooperative relationships
- Exchange information on best practices
- Leverage resources to maximize worker safety and health protection
- **Gain recognition as a proactive leader in safety and health**

MIOSHA Training Institute

- **Over 35,546 Attendees**
- **Over 2,146 Total MTI Graduates**
 - Level I
 - Level II
 - Oakland University Alliance
 - Occupational Health
- 23 Co-Sponsor Locations – Community Colleges
- Taught by MIOSHA Consultants
- Over \$26,902 in Scholarships Awarded in FY 2023 to 369 Students
- **Almost \$490,000 Scholarships** since FY 2011

MIOSHA Training Institute (MTI) to Oakland University B.S. Environmental Health Safety Degree Completion Program

**OAKLAND
UNIVERSITY™**

For more information call the MIOSHA Consultation Education and Training (CET) Division at 517-284-7720 or visit www.michigan.gov/mti.

What is a press brake and what standards and rules apply?

A press brake is a machine used to punch, form, and bend metal. Press brakes are covered under Part 4, General Occupations §4091.0014 (4) and (5). Press brakes are accounted for by a foot pedal, two hand controls, or both used in sequence.

When is operator protection required while operating a press brake?

Any time a press brake is in use and there is potential for injury or pinch point opening more than 1/8-inch, operator protection is required. Without protection a press brake is dangerous and can cause severe injuries.

What types of operator protection is used for press brakes?

Press brakes have various types of operator protection available depending on how the press brake is used. Refer to the Operator Protection Fact Sheet on page 2.

Point of Operation Guards and Devices

Light curtains and other presence sensing devices are effective protection methods for press brakes. Light curtains can be set up to activate during the hazardous part of the cycle, and muted during the non-hazardous part of the cycle. This allows the bending to occur without interrupting the light curtain. Refer to diagrams on page 2.

Two hand controls are effective when the parts are small, can be placed in holders, and parts don't require holding during the bend. Blamers and other devices can hold the part in place. Two hand controls can also be used to lower the part to 1/8 inch or less and then change to foot pedal to complete the bend.

Fullbacks and restraints can be used to prevent hands from entering the point of operation. Fullbacks are adjusted to allow more access to the die opening but pulling the hands back during the hazardous closing of the die. Restraints have a fixed position to prevent hands from entering the point of

operation in plain view on the machine during "hold" tools shall be used to hold stock."

Hand tools may be used as compensation with safety guards in devices such as restainers, fullbacks or blamers should be allowed the operator to place small parts in the point of operation.

If there are 2 or more work pieces of one specific bend, a guard or device is required and hand tools are not permitted during operation protection.

Safe distance is a form of operator protection that should be used only when other protection is not possible. Safe distance protection may be applied when the operator is not required to hold the work piece within 4-inches of the point of operation. Safe distance is measured 4-inches or more from closing of the punch point closest to the operator.

When safe distance is used as operator protection there is an increased risk of injury. Point of operation guards and devices are a more effective method of operator protection.

NEW – Mental Health Resources
Mental Health Affects Workplace Health & Safety!

Consultation, Education and Training (CET) Workplace Hazard Surveys

- **Free**, voluntary full or partial hazard survey, with **no fines or penalties**, to **ALL Employers**
- Employer agrees to correct serious hazards with help from MIOSHA consultants
- **Free** air and noise exposure monitoring
- Request a **CET Hazard Survey** at www.Michigan.gov/cetrca or call **517-284-7720**
- Use hazard survey findings to apply for the **MIWISH CET Grant Program** to make corrections (up to \$5,000) www.michigan.gov/mioshagrants

Michigan Workplace Improvements to Safety and Health (MiWISH) Grants

- **Matching reimbursement grant (\$5,000 maximum)** for the purchase of safety and health equipment and corresponding training
- **Small employers** (<250 employees) in high hazard industries
- Use **\$250,000** of state funding annually
- **\$592,000** total invested in **Worker Health and Safety** with employer overmatch in **FY 2023**
- ***FY 2024 funding doubled to \$500,000***

CET Grant Recipients FY24

\$870,000 Awarded to 20 Grantees

AFL-CIO of Michigan

Safety and health training for manufacturing, healthcare, and construction industries

Alpena Community College

Safety and health training throughout Northeast Michigan in healthcare, construction, manufacturing, forestry, and logging industries

Associated General Contractors (AGC) of Michigan

Safety and Health Support for Construction

Bay College

Tree trimming and chainsaw safety training

Center for Workplace Violence Prevention

Training for active shooter and other workplace violence prevention

Corewell Health Lakeland Hospitals

Safety and health training on first responder safety

Eastern Michigan University

“Protection from Crystalline Silica”

Emergency Services Rescue Training

Training first responders regarding farm emergencies

Great Lakes Safety Training Center

Lockout/Tagout safety training

Incompass Michigan

Safety and health training for staff of community rehabilitation organizations and disabled workers

Lawrence Technological University

Safety and health training for highway/temporary work zones

CET Grant Recipients FY24

\$870,000 Awarded to 20 Grantees

Michigan Association of Chiropractors

Customized on-site training program for ergonomics

Michigan Green Industry Association (MGIA)

Promote awareness of dangers in tree care operations

Michigan Infrastructure and Transportation Association (MITA)

“MITA Suicide Prevention” onsite training programs offered to heavy construction companies

Michigan State University

Safety and health training for agricultural industry

Parents for Student Safety Employment Standards (PASSES)

Student training in construction trades, industrial arts classes, and co-op programs

Retail, Wholesale, and Department Store Union (RWSDU)

Hazard specific training programs and educational materials to help food and beverage facilities

United Automotive Workers (UAW)

Safety and health training and assistance to smaller Michigan employers

University of Michigan Center for Ergonomics

Ergonomic training and technical assistance for small and medium sized Michigan companies

Wayne State University

Mental health training and awareness for construction industry

Emphasis Programs

- Federal OSHA initiates National Emphasis Programs (NEP)
- States plan states like Michigan typically adopt NEPs to address national trends.
- State plan states also have the option of initiating State Emphasis Programs (SEP) to address statewide trends.

National Emphasis Program Trenching

Slope It - Shore It - Shield It

- **Heat Stress**
- **Oil & Gas Well Operations**
- **Cannabis Industry**
- **Utilize MIOSHA CET Services!**

Fall fatalities were decreasing but rose in 2022, we will continue to focus on falls in the workplace!

- 2016 – 22 of 43 fatalities were due to falls (51%)
- 2017 – 15 of 38 fatalities were due to falls (39%)
- 2018 – 8 of 38 fatalities were due to falls (21%)
- 2019 – 11 of 38 fatalities were due to falls (29%)
- 2020 – 8 of 64 fatalities were due to falls (13%)
- 2021 – 4 of 42 fatalities were due to falls (10%)
- 2022 – 11 of 45 fatalities were due to falls (24%)
- 2023 – 6 of 34 fatalities were due to falls (18%)

MIOSHA FY 2023 Activities

Consultation

766 On-site Hazard Surveys

1,275 Off-site Consultations

Enforcement

3,395 On-site Inspections

1,440 Off-site Letter Insp.

Enforcement Inspections

Types of Inspections

- **Fatalities** - MIOSHA responds to workplace fatalities within 24 hours
- **Complaints** - Employees have the right to file a complaint if they feel unsafe
- **Referrals** - Government Agencies, Media, Employer Reported Hospitalizations
- **Targeted Programmed** - High Hazard Industries, New Trends (Falls, Cave-ins)

MIOSHA FY 2023 Activities

Top 10 Standards Cited

Does not include other-than-serious violations

Standard Cited	Times Cited	# of Instances	Initial Penalties
Parts 42/92/430 Hazard Communication	354	582	\$357,100
GI Safety Part 85 The Control of Hazardous Energy Sources (Lockout/Tagout)	348	509	\$882,200
Part 451 Respiratory Protection	300	427	\$297,000
CS Part 45 Fall Protection	283	381	\$374,500
Part 602 Asbestos Standards for Construction	201	231	\$90,300

MICHIGAN WORKER DEATH NOTIFICATION

The information below shares **preliminary details** about the **1st and 2nd Michigan worker deaths of 2021** reported to the Michigan Occupational Safety and Health Administration (MIOSHA) which is believed to be covered by the MIOASH Act. Employers and employees are urged to use extreme care and safety diligence in all work activities. The description reflects information provided to MIOSHA at the initial report of the incident and is not the result of the official MIOSHA investigation. To report fatalities/catastrophes, call MIOSHA at 800-858-0397.

If you need help or assistance in ensuring your workplace is safe, MIOSHA is here with resources to help. The Consultation Education and Training (CET) Division provides workplace safety and health training and consultations to employers and employees throughout Michigan free of charge. Contact CET today at 800-866-4674 or submit a request online at www.michigan.gov/cetrca.

Every life is precious. Our mutual goal must be that every employee goes home at the end of every shift.

takes pleasure in presenting this
CERTIFICATE OF ATTENDANCE

to

for your active participation in

MTI Testimonials

The MTI certificate program offered by MIOSHA has been a transformative journey for me, significantly enhancing my expertise and passion for the EHS field. As an EHS representative, the comprehensive curriculum and the exceptional leadership displayed by the OSHA instructors have not only broadened my knowledge base but also sharpened my skills in a practical and engaging manner. This program has equipped me with a deeper understanding and a set of tools that I've already begun to apply in my workplace, leading to noticeable improvements in our safety culture and practices. The professional and smooth execution of the program, combined with the invaluable insights gained from both instructors and peers, has made a profound impact on my professional development. It's an experience that I credit for a significant part of my growth in the EHS field, and I strongly recommend it to anyone looking to make a meaningful impact in their career, regardless of their experience level.

Sarah MacIntyre, American Axle and Manufacturing

MTI Testimonials

The MIOSHA Training Institute has provided me with an incredible opportunity to learn more about our health and safety standards and ways of improving our safety processes with the goal of creating a total safety culture. The scholarship program makes it even more of a value for any company's budget... I would highly recommend any company to participate in this program. It's about keeping people safe and giving them the tools and processes to do so. Safety is a value that we must all own! Thank you, MIOSHA Training Institute for providing this one-of-a-kind service and opportunity!

Greg Hemme, Crest Pontoon Boats

MTI Testimonials

I am deeply grateful for the opportunity to receive certification through the MIOSHA Training Institute, which has been instrumental in bolstering my contribution to my company's safety strategies and overall efforts... This certification has not only enhanced my personal skill set but has also empowered me to lead our safety initiatives more effectively... The knowledge and proactive safety practices gained from this experience underscore our commitment to exceeding workplace safety standards, making the MIOSHA Training Institute an invaluable resource for professional development in occupational safety and health.

Alex Bolton, Huhtamaki

MTI Testimonials

The MIOSHA Training Institute has allowed me to get answers for my health and safety questions directly from the source, MIOSHA Inspectors. MIOSHA classes are a great way to learn about the rules and standards that apply to your operations without trying to interpret the confusing language often found when reading regulations on your own. MIOSHA has allowed me to become more knowledgeable and confident in my safety career through their training courses.

Shane Stephenson, Mott Community College

The training provided through MTI made an immediate difference. The quality of the content, and the professionalism of the training staff at MIOSHA can not be understated. My workplace is safer today because of the training I received and the core tools we were able to implement at Air Lift.

Drew Kepler, Air Lift Company

Thank You For Making a
Difference in
Safety and Health!!
