

A photograph of an industrial facility at night, illuminated by various lights. The scene shows tall distillation columns, pipes, and structural steel against a dark sky. The lights create a high-contrast, industrial atmosphere.

Leveraging Gas Detection Data

Andy Speidel – Connected Sales Rep

TIMES ARE CHANGING QUICKLY

POWERFUL, SEAMLESS TECHNOLOGY IS FINALLY HERE – CREATING MASSIVE OPPORTUNITY FOR SAFETY.

1910.1020/1926.33 - Access to employee exposure and medical records.

1910.1020(d)(1)(ii)

▪ **Employee exposure records.** Each employee exposure record shall be preserved and maintained for at least thirty (30) years, except that:

1910.1020(d)(1)(ii)(A)

▪ Background data to environmental (workplace) monitoring or measuring, such as laboratory reports and worksheets, need only be retained for one (1) year as long as the sampling results, the collection methodology (sampling plan), a description of the analytical and mathematical methods used, and a summary of other background data relevant to interpretation of the results obtained, are retained for at least thirty (30) years; and

1910.1020(d)(1)(ii)(B)

▪ Material safety data sheets and paragraph (c)(5)(iv) records concerning the identity of a substance or agent need not be retained for any specified period as long as some record of the identity (chemical name if known) of the substance or agent, where it was used, and when it was used is retained for at least thirty (30) years; ¹ and

1910.1020(d)(1)(ii)(C)

▪ Biological monitoring results designated as exposure records by specific occupational safety and health standards shall be preserved and maintained as required by the specific standard.

1910.1020(d)(1)(iii)

▪ **Analyses using exposure or medical records.** Each analysis using exposure or medical records shall be preserved and maintained for at least thirty (30) years.

1910.1020(e)(1)(i)

- Whenever an employee or designated representative requests access to a record, the employer shall assure that access is provided in a reasonable time, place, and manner. If the employer cannot reasonably provide access to the record within fifteen (15) working days, the employer shall within the fifteen (15) working days apprise the employee or designated representative requesting the record of the reason for the delay and the earliest date when the record can be made available.

1910.1020(e)(2)(i)

- **Employee exposure records.**

1910.1020(e)(2)(i)(A)

- Except as limited by paragraph (f) of this section, each employer shall, upon request, assure the access to each employee and designated representative to employee exposure records relevant to the employee. For the purpose of this section, an exposure record relevant to the employee consists of:

1910.1020(e)(2)(i)(A)(1)

- A record which measures or monitors the amount of a toxic substance or harmful physical agent to which the employee is or has been exposed;

Compliance

Compliance has been a necessity for a long time – but with antiquated technology, it can be a burdensome process that is more about keeping up, rather than getting ahead.

Monitoring

Historically – monitoring has only been about local awareness. With today’s technology, real-time visibility with ease is now a reality.

Insights

With cloud-connected devices producing vast data sets transmitted instantly to the cloud – there is new opportunity to leverage this data and provide powerful insights that efficiently drive your safety program forward.

MAKE TODAY’S PROCESSES BETTER. ADD NEW LAYERS OF SAFETY. A SPIRIT OF CONTINUOUS IMPROVEMENT.

COMPLIANCE

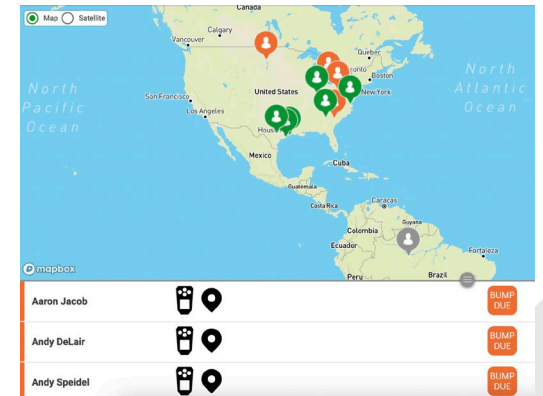

PERSONALIZATION

Simplify digital assignment to promote robust processes and tie your gas detection data to every worker – regardless of what device they use.

PEACE OF MIND COMPLIANCE

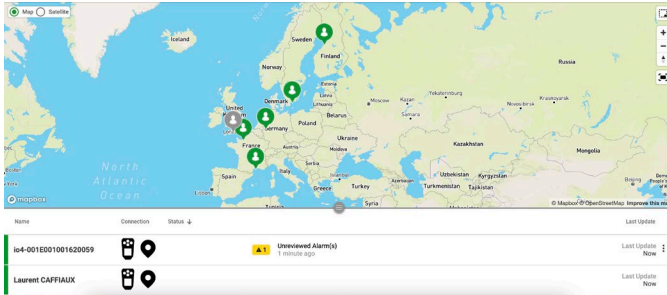

Make sure your workforce follows best practices without the need for additional labor or constant oversight.

VISIBILITY. LOCAL OR REMOTE.

Understand worker compliance at your fingertips or at a glance.

MONITORING

FULL SAFETY VISIBILITY.

Know where your workforce is. Know they're compliant. Know they're safe. It's all there in one single view.

Gas Readings

COMB 0 %LEL	CO 0 PPM	H₂S 0 PPM	O₂ 20.8 %VOL
--------------------------	-----------------------	-----------------------------------	--------------------------------------

ASSESS A SITUATION.

Understand an incident and real-time to determine immediate action whether it's from central command or you're mobile.

 EVACUATE

 SEND A MESSAGE

ACT IMMEDIATELY.

Respond quickly with situational awareness – whether it's advising an evacuation to workers in the area, sending a message or sending help.

INSIGHTS

WHAT HAPPENED

Quickly understand what happened during an incident including location and exposure length & severity .

WHO IT HAPPENED TO.

Know what happened to who and do it all seamlessly with digital personalization.

WHERE IT HAPPENED

Identify problem areas or high-risk zones within a worksite or understand low-level or alarm-level exposures to take action proactively.

3 Lessons...

- Lesson 1: Data is only Data
- Lesson 2: Diversity in teams is key
- Lesson 3: Beware of the obvious answer

Conclusion

“Data guides what we do, how we do it, and how we improve on it. Data also helps us engage in value-add opportunities with our stakeholders, finding ways to recognize and pass on savings to our organizations, seek methods to enhance product/service capabilities in the most efficient ways possible, and track down potential solutions that are innovative and out-of-the-box. When we take on projects, problems, or initiatives and base our confidence on our *data collection* abilities, however, we do ourselves, and our stakeholders a disservice. But when we see the "obvious answer" emerge from the data, then work as a team to present perspectives to challenge that assumption, that is when we have the best chance of success.”

- Quote by: Daniel Siegel

A close-up, profile view of a worker wearing a brown hard hat and safety glasses, looking upwards. The worker is wearing a safety harness and is positioned on a structure with ropes and metal beams. The background is dark, and the lighting highlights the worker's face and the texture of the hard hat and safety glasses.

Thank You

At MSA, we know what's at stake.
