WHY

WHY

WHY

- LOTO inadequate
- No crane spotter
- No control of custody for remotes
- Work at height not communicated
- Inadequate safeguarding of bridge crane

Crane operator 1

Spotter

SCAN:

Scan area for potential hazards

Crane operator

Medium Term- Accepted Project

Poke-yoke overhead bridge interface zone

- » L.E.D. optic sensor mounted on each end to the crane end truck.
- » This device will react like an emergency stop and stop the crane travel immediately
- » if the beam is broken. This will only stop the crane that the device is mounted on.

WHY

WHAT

Take a personal inventory:

What's my safety why?

**What's one thing I can do to
make a difference?**

HOW

**“No man ever listened himself
out of a job”**

– Calvin Coolidge
